PROFESSIONAL SUMMARY

Computer Science student majoring in Software Development and Artificial Intelligence, with hands-on experience through academic and personal projects in software development, web development, databases, and AI. Familiar with Python, C, C++, C#, Java, JavaScript, Vue.js, HTML, CSS, and MySQL. Seeking an internship position from 21 December 2026 to 26 February 2027 to apply my technical skills, gain industry experience, and contribute to real-world projects.

EDUCATION

Bachelor of Computer Science

February 2025 – February 2028

Swinburne University of Technology, Sarawak Campus

- Major in Software Development and Artificial Intelligence
- Current CGPA: 3.84

Foundation in Engineering

July 2024 – January 2025

Swinburne University of Technology, Sarawak Campus

- Final CGPA: 3.88

TECHNICAL SKILLS

- Languages: Python, C, C++, C#, Java, JavaScript
- Web: HTML, CSS, Vue.js, React Native, Node.js
- Database: MySQL
- AI/ML: Machine Learning, LSTM, GRU, Decision Trees, Search & Optimisation Algorithms
- Tools: Git, GitHub, VS Code, Visual Studio, Raylib
- Networking: IPv4/IPv6, Ethernet, Routing, Switching
- AI-Assisted Development: ChatGPT, OpenAI Codex

WORK EXPERIENCE

Social Media & Video Editing Assistant – Unique One Stop Otomobil Sdn Bhd

July 2026 – Present

- Occasionally take photos and edit short-form vehicle videos for TikTok and social media.
- Assist with posting vehicle listings and promotional videos on TikTok.
- Gained practical experience in video editing, digital content creation, and online promotion.

LANGUAGES

- English – Intermediate
- Mandarin – Fluent

PROJECT EXPERIENCE

Unique One Stop Otomobil Car Dealership Website | Vue.js, Node.js, MySQL

- Developed a full-stack web application to display and manage second-hand vehicle listings.
- Built the frontend using Vue.js and developed backend functionality using Node.js and MySQL.
- Explored Cloudinary for image management and cloud database deployment options.

Pet Adoption Management System | Vue.js, Java, MySQL, HTML/CSS

- Developed a web-based pet adoption management system integrating frontend, backend, and database components.
- Applied web development and database concepts to support pet and adoption-related information management.

Skybanner Run – 2D Platformer Game | C, Raylib

- Developed a 2D platformer game featuring player movement, collision detection, enemies, environmental hazards, and multiple difficulty levels.
- Implemented gameplay mechanics and score-saving functionality using the Raylib graphics library.

AI Traffic Prediction & Route Guidance | LSTM, GRU, Decision Tree, Graph, IDA*

- Explored machine learning and search-based approaches for traffic prediction and route guidance.
- Studied the application of LSTM, GRU, Decision Tree Regression, graph-based routing, and IDA* to the problem.

Intelligent Delivery Vehicle Routing System | Java, JADE, GA, ACO, SA

- Developed an academic intelligent-system solution for delivery vehicle routing using a multi-agent approach.
- Explored optimisation techniques including Genetic Algorithm, Ant Colony Optimisation, Simulated Annealing, and Greedy Nearest Neighbour.

Smart Ground-Truthing & Digital Biodiversity System | React Native, Node.js, MySQL – *Present*

- Developing a mobile and web-based platform for digital plant species documentation and biodiversity data management.
- Working on QR-based plant identification, GPS location recording, plant information management, and database integration.
- Contributing to a digital plant knowledge system supporting biodiversity research and conservation activities.

Treasure Island – Strategy & Puzzle Game | C++, Raylib – *Present*

- Currently developing a 2D strategy and puzzle game using C++ and Raylib.
- Implementing gameplay mechanics, map-based interactions, and puzzle-solving elements.

CERTIFICATION

- CCNA: Introduction to Networks — Cisco Networking Academy | March 2026
- Craft Precise Prompts for AI Models — IBM SkillsBuild | September 2026
